

I am a third-year computer science student at the University of Lincoln, intending to work toward a master's degree in user experience design. My main interests are UXD, human-computer interaction, the concept of technology becoming an integral part of our daily lives.

## Education

### University of Lincoln

BSc (Hons) Computer Science (currently in my final year)

2018 – present

### Sir John Nelthorpe School, Brigg

A-levels: computer science (B), mathematics (C), physics (C)

GCSEs: 1 A\*, 7 As, 2 Bs

2011 - 2018

## Experience

### Interaction design for automated poetry generation

July – August 2020

My role in this project was to develop a concept of a use case for AI-generated poetry. I worked on the project alone for size weeks, with weekly supervision meetings, using Figma for digital mock-ups. Throughout my time working on the project, I gained valuable insight into the methodology of interaction design and the fact that the brief was not my own creation meant that I gained some experience of working for a client-like figure.

## Awards

### Microsoft Technology Associate Certifications

2019 – 2020

[Introduction to Programming using Java](#) (87%)

[Introduction to Programming using JavaScript](#) (88%)

[Introduction to Programming using Python](#) (88%)

[Software Development Fundamentals](#) (80%)

## Skills

**Highly motivated** and **eager to learn**. After getting lower-than-expected A-level results, I challenged myself to get a first-class grade in each year of my university degree. So far, I have been able to achieve this goal.

Experience **working in groups** involving **meeting deadlines** and **communicating** with members working on different aspects of our projects. I have also previously **successfully lead a group project** which was awarded a first-class grade.

I have experience with multiple coding languages through university modules (**C#, C++, HTML, CSS, JavaScript**), my A-level course (**Python**), and my own extra-curricular projects (HTML, CSS, JavaScript). My competency in many of these languages has been recognised through my university grades and Microsoft Technology Associate awards.

I have used **Adobe XD, Figma**, and **Visual Studio** multiple times throughout my university course and in my own extra-curricular projects.

## Employment History

### Customer Care, McDonald's 0097, Lincoln

September 2018 - November 2019

In this role, I was responsible for restocking and maintaining a clean and tidy dining area, dealing with customer inquiries, and resolving any customer issues. This job helped me immensely improve skills such as teamwork, time management, and working in wildly varying paces of environment.

## Hobbies and Interests

In my free time, I enjoy creating small web projects that I host on [my website](#). I am a keen photographer and I also enjoy playing guitar and listening to audiobooks. Recently I have begun learning Norwegian and regularly running.
